

This book provides an introduction to using quantitative methods in educational research. The author writes for non-mathematical students, avoiding the use of mathematical formulae wherever possible. No prior knowledge of quantitative methods is needed to use this book. The authors approach features: a realistic approach, using actual databases · an emphasis on the use of effect sizes · a user-friendly approach, based on the latest version of SPSS throughout. The use of two real educational datasets keeps the content relevant, and shows students the imperfections and problems which they will meet in real-life research. The datasets use common international measures and access to the datasets, allowing students to practice and answer the questions that follow each chapter, is available through the book website. This book is for researchers and students studying research methods in education. It is suitable as a main textbook for quantitative methods courses, as well as a resource for researchers in this field.

Revolving Doors, Robert Burns, how to know him, The Missions Bloom (Father Seras Legacy Book 3), Final Stop Albuquerque, Dying to Be Murdered (Thorndike Paperback), Magic Motorways, Still Livin: The True Story of How One Couple Defied All Odds and Found the Gift of Life, Watergate Summer, Lord Carteret, a Political Biography, 1690-1763,

Doing Quantitative Research in Education with SPSS - AbeBooks Daniel Muijs is the author of Doing Quantitative Research in Education with SPSS (3.92 avg rating, 12 ratings, 1 review, published 2004), Effective Teach **Doing Quantitative Research in Education with SPSS SAGE** Doing Quantitative.
