

## Foreboding: Natasha Carmichael Series: Book Seven

Werewolves have begun attacking vampires and Natasha Carmichael believes it is only a matter of time until they start attacking half-castes. Unfortunately, the Council isn't willing to ask nicely for help so the Elders are turning a blind eye to the problem. Natasha goes out on a limb to make Soong hear her concerns, but he is less than receptive. As a general sense of pending doom settles over Natasha and her coven, no one can say which light fuse will lead to an explosion, but everyone knows something bad is coming.
