

Cultural Encounters: European Travel Writing in the 1930s (Remapping Cultural History)

The 1930s were one of the most important decades in defining the history of the twentieth century. It saw the rise of right-wing nationalism, the challenge to established democracies and the full force of imperialist aggression. Cultural Encounters makes an important contribution to our understanding of the ideological and cultural forces which were active in defining notions of national identity in the 1930s. By examining the work of writers and journalists from a range of European countries who used the medium of travel writing to articulate perceptions of their own and other cultures, the book gives a comprehensive account of the complex intellectual climate of the 1930s.
